## *Comments by ECE Colleagues*

---

*“Thank you for launching this amazing initiative.”*

Todd Zickler  
Professor of Electrical Engineering and Computer Science  
Harvard School of Engineering and Applied Sciences

*“I would like to thank you for your generous offer of a pdf version of your electrical engineering textbooks. Our department uses the current version of your book for our Signals and Systems course, and I would be most appreciative if I could get a copy of that book. Thank you for the offer!”*

Len Trombetta  
Associate Professor, ECE  
University of Houston

*“Thank you for your efforts. I’m really enjoying your examples and explanations throughout Circuit Analysis and Design. The content is accessible and I find the examples compelling.”*

Shani B, PhD  
Associate Professor of the Practice  
Electrical and Computer Engineering & Computer Science  
Duke University

*“Thank you for taking this giant step forward to help our students. This action no doubt will help keep the movement for speeding knowledge as we move forward.”*

Regards  
Issa Batarseh  
Professor, ECE  
University of Central Florida

*"It is a wonderful move from you and your coauthors to make this book (Signals and Systems) available for free to students."*

Andre Tits  
Professor, ECE  
University of Maryland

*"Thank you for this amazing resource. We have used your textbook for many years here at Penn. We are currently using the 3rd edition of your textbook. Thank you so very much for this initiative, the students will be very excited! Warmest regards & thank you/for this great book!"*

Tom Farmer  
Senior Lecturer  
University of Pennsylvania

*"I heartily applaud your team's collective efforts to establish affordable options for students. Recalling my old textbook purchases, I remember recoiling at the price of a particular textbook in Finite Elements while a graduate student at Texas. Looking back, it was a pittance compared to today's textbook burden."*

Dwight Waddell  
Chair, Biomedical Engineering  
University of Mississippi

*"I am the Chair of Electrical Engineering at the University of Hawaii at Manoa, and became aware of the Free Electrical Engineering Textbook Initiative through an ECEDHA email message. This is a generous and innovative initiative! Incidentally, I'll be using your 7th edition EM book when I teach our junior-level EM course this fall. "*

Wayne Shiroma  
Professor and Chair, Department of Electrical Engineering  
University of Hawaii

*"Thank you for your commitment and dedication to our field of study. I appreciate your offer of free textbooks to students. I incorporated your book into my course and students loved it! "*

Shonda Bernadin  
Associate Professor of ECE  
FAMU-FSU College of Engineering  
Florida A&M University

“I wholeheartedly applaud your decision to provide these books to students free or at cost. Many thanks!”

Matt Johnston  
Assistant Professor, ECE  
Oregon State University
